INSPECT POINT PRESENTS:

AVOID SPOOKY ISSUES WITH INSPECTIONS

Stay safe this Halloween...

Missing Inspections

Yikes! Missing an inspection can be scary especially when tracking manually. Inspect Point allows you to schedule your next inspection directly within the customer account and puts it on the calendar for all the ghouls and goblins to see.

Generating And Sending

Paper inspections can give you nightmares. With Inspect Point, you generate the report as you're doing the inspection - photos and all! When you're done with the inspection, you're done with the report. Generate and send wicked reports in just a few clicks!

Critical Deficiencies

Handwritten reports can look like a witches brew, and things can be overlooked. Inspect Point allows your technicians to list critical deficiencies and keep your inspections consistent for each tech.

Double Scheduling

Some schedules are harder to navigate than a corn maze. Our master schedule calendar lets you see where your techs are, where they're scheduled in the future, and openings you can fit more jobs into. Now that's boo-tiful!

NFPA Changes

Don't go batty trying to keep up with NFPA updates. Inspect Point incorporates changes directly into our platform automatically so you can keep your paper templates in the graveyard.

HAPPY HALLOWEEN FROM YOUR FRIENDS AT INSPECT POINT!

INSPECT POINT

Over 3,000,000 inspections completed and counting...
